

Maintain Free-Flowing Drains and Pipes

Our special formula contains nonpathogenic bacteria that multiply and dissolve grease, fat and food particles that clog drains and pipes and cause malodors.

SWISHER® ENZYMATIC DRAIN TREATMENT

- Enzyme-producing bacteria multiply to dissolve biodegradable waste
- Reduces grease, fat and food particle build-up in drain lines
- Neutralizes unpleasant drain odors

Swisher Enzymatic Drain Treatment

is a bioenzymatic formulation designed specifically to restore flow in grease-laden drain systems. It also provides rapid penetration, breakdown, and degradation of organic drain line deposits and blockages.

DIRECTIONS:

For grease traps less than 20 cubic feet capacity:

1. Add 4-6 ounces daily by pouring product into the sink closest to the trap. This should be done at night when the traps are used the least.
2. Flush drain with a cupful of lukewarm water.

For grease traps larger than 20 cubic feet capacity:

1. Add 18-20 ounces daily to the main sink drain using the same procedure listed above. This product may also be used in automatic dispensing systems equipped with a timer to ensure constant and programmed application rates.
